# Welcome

Dear colleagues,

On behalf of the cardiology department of the military medical academy, I have a great pleasure to invite all interventional cardiologists to share the 17th annual conference of the Egyptian working group of intervention which will be held at Mariott-Zamalek hotel on the 5th and 6th of November 2014.

**Khaled Shokry, M.D**  
Conference Chairman

Our goal in this conference is to introduce the most advanced techniques in the field of interventional cardiology by a group of eminent national and international experts.

This will be achieved through real-time transmission of difficult coronary intervention techniques, allowing discussion between medical colleagues.

In addition, there will be a number of live in a box cases demonstrating different interventional techniques in variable inteties.

The program also includes number of well selected case presentations done by national and international experts, showing their own experience.

Our unique profession, interventional cardiology, uses integration between scientific evidence and practical skills to deliver accurate judgment and definitive treatment to our patients.

Hope to enjoy fruitful meeting, exchange experience and gain the maximum benefit.
